Hi Kim (and other colleagues)

I know Daniel has been ill for a couple days so I am not sure he responded to your request. We were hoping to address:

- Changes we will make to the BE incorporating additional no effect determinations as your letter suggests
- Review our options concerning Delta Smelt to make sure folks understand our statutory obligations and options going forward
- Discuss the basis for your non-concurrence on Delta Smelt and explore the option to provide additional information that might enable us all to resolve this through informal consultation. The State did extensive analysis supporting both its adopted DO standard and TMDL implementation plan, which includes several actions intended to address potential causes of DO issues in the Marsh further monitoring of the situation.
- If resolving through informal consultation looks infeasible, discuss how the formal consultation would proceed

That should keep us busy for awhile. Thanks- talk to you soon

Dave

Hi Daniel,

Can you provide an agenda? Looks like you're inviting more people that may not be familiar with section 7 consultation and the ESA. I want to make sure this meeting is in the proper context of discussing our letter in response to EPA's effects determinations as it relates to the section 7 consultation and process.

Thanks,

Kim
